Information for Teachers

Seventh Annual McMaster Brain Bee

February 16, 2010

- The **Psychology, Neuroscience, and Behaviour** department at McMaster University is hosting the 7th Annual McMaster Brain Bee. Modeled after a spelling bee, students answer questions about the brain and neuroscience.
- The competition is open to students in grades 9 – 12 from all high schools in Hamilton and surrounding areas.
- Questions for the competition are based on the 2005 edition of the “**Brain Facts**” book (available online, check our web site for the link). This book is all you need to study for the local competition.
- There will be prizes for the 1st, 2nd, and 3rd place winners.
- McMaster University will also be hosting the **Third CIHR Canadian National Brain Bee (CCNBB)** in the Spring of 2010! We hosted the first and second CCNBB in May 2008 and 2009 and they were both a great success. Winners from local brain bees all over Canada will come to compete at the CCNBB. The winner will represent Canada at the International Brain Bee, to be held in San Diego, California in the fall of 2010. There are lots of prizes (cash, scholarships, trophies, travel) at each level of the competition.
- Interested students should visit our website:
<http://brain.mcmaster.ca/BrainBee/>
- And definitely check out the CCNBB website for highlights of the first Canadian national competition:
<http://brainbee.ca/>

See reverse for more details....

Information for Teachers

Seventh Annual McMaster Brain Bee, February 16, 2010

What is the Brain Bee?

- Modeled after a spelling bee, grade 9 to 12 students answer questions about the brain and neuroscience. This event provides students with a fun and exciting way of learning about issues such as memory, emotions, intelligence, movement, aging, stress, and lots more. Participation is a wonderful addition to an academic resume.

What is required?

Before the competition:

1. Visit the McMaster Brain Bee website (<http://brain.mcmaster.ca/BrainBee/>) for lots of information about this and past Brain Bee competitions.
2. Obtain a copy of the new 2005 edition of "Brain Facts" (available online, check our web site). All questions in the local Brain Bee will come from this book.
3. To register, visit the McMaster Brain Bee website at <http://brain.mcmaster.ca/BrainBee/>
4. Start studying! Students are welcome to study individually, in groups, or even organize a "Brain Bee Study Team" for their school. The competition itself is at an individual level.

On the day of the competition:

1. On Tuesday, February 16, 2010 students should arrive at McMaster University (Psychology Building) between noon and 1pm, ready to compete. We will all meet in the lobby of the Psychology building. The Brain Bee begins at 1pm and will end at about 4:30pm. Campus maps can be found on the Brain Bee web site.
2. Teachers are encouraged to come and support their students, but students are more than welcome to attend on their own if a teacher is not available.
3. Students, parents, teachers, and friends are all welcome to come and watch, even if they are not competing.
4. Enjoy the competition, reception and awards ceremony. There are prizes for the 1st, 2nd, and 3rd place winners, and certificates and prizes for all the competitors.

Contact Dr. Judith Shedden at shedden@mcmaster.ca or Katherine Holshausen at holshak@mcmaster.ca if you have any questions about the competition, and also if you have ideas for how we might make it better!
